Cork University Dental School and Hospital

The University Dental School and Hospital is primarily a teaching institution. ***The mission statement of the Dental School is: Advancing Oral Health through excellence and innovation in education, patient care and research.*** Through its teaching, a service is provided to the community at a low cost.

Access to clinical services for new patients may take place in the following ways:

1. Direct referral by a Dentist, General Practitioner or a Consultant to a named Consultant in the Cork University Dental School & Hospital. **Please note you will have to pay in full for any treatment received.**
2. Referral by a Principal Dental Surgeon, HSE South (for full medical card holders in HSE South) to a named Consultant in Cork University Dental School and Hospital. [HSE South Catchment Area](#) (110kB). This referral can be made by completing the CUDSH referral form or you can now refer electronically. Please visit our website for links to the referral form or the Healthlink site.
3. Walk in attendance at our Emergency Clinic. **Please note you will have to pay in full for any treatment received.**
4. For Oral Health and Development Clinics, specific arrangements are in place with the HSE under Service Level Agreements.

On receipt of a referral, you will be placed on waiting list and will be contacted regarding an appointment.

At your first appointment, you are first seen by a qualified dentist who provides you with an assessment of your dental needs.

Should you be suitable for treatment by one of our students, an appointment will be scheduled. There is a waiting list for some procedures and you will be informed of its duration at your assessment visit. **Not all patients are suitable for treatment by an undergraduate student.**

Your dental care provided by a dental student will take longer than would be the case in general practice. **This will include longer treatment times and more appointment dates.**

Patients Fees and Charges

Please note that Cork University Dental Hospital is not a part of the HSE and does not operate under the DTSS, therefore your medical card cannot be used to cover your care here unless you have been approved by the HSE Principal Dental Surgeon.

Payment for treatments

All treatments must be paid for on the day treatments are provided or on receipt of a bill. In cases where treatments will continue over a period of time, treatment costs will be discussed with you and a payment schedule can be organised in accordance with the policy in place. **Please note that the treatment plan and hence the costs may be subject to change during the course of treatment.** 50% of the Laboratory work associated with treatment **must be** paid for in advance. If you have any queries, please ask any of our Reception Staff who will be pleased to help.

We accept the following methods of payment at our Reception Desks:

Cash

Cheque/Postal/Money Order (made payable to University College Cork)

Credit or Laser Card

Debt Collection

The Cork University Dental School and Hospital engages the services of a Debt Collector to recover outstanding debts.

Medical Card Holders (Full)

Medical Card holders from HSE South who are referred by a HSE Principal Dental Surgeon are provided with the treatments for which they are referred. Medical Card holders outside HSE South must have a referral letter from a HSE Principal Dental Surgeon confirming that the cost of their treatment will be covered by the HSE. If a referral letter from a HSE Principal Dental Surgeon is not provided, a check-up fee of €65 plus the cost of any treatment must be paid, this is non-refundable. **All HSE referrals must be in writing and must be received in advance of any treatment being provided. Patients presenting without a referral letter from a HSE Principal Dental Surgeon are entering into a private arrangement and must pay for any consultation/ treatment provided on the day as per the pricelist.**

PRSI/Tax allowances

While PRSI contributions/stamps do not provide cover for treatment in Cork University Dental School and Hospital certain dental treatments do qualify for tax relief. (Please note that this is subject to change)

Treatments that qualify for tax relief* include:

Surgical Removal of impacted wisdom teeth

Crowns, veneers, bridgework

Root Canal treatment

Implants

****Subject to Revenue regulations***

Med 2 forms are available on request from any Reception desk.

Link to revenue website: www.revenue.ie
