**School of Public Health**

**Conferences Attended:**

International Society of Behaviour Nutrition and Physical Activity in Uppsala Sweden.

I am very grateful to the College of Medicine and Health for awarding the travel bursary which allowed me to travel to this important international conference. I had an oral and a poster presentation at the conference which had 1300 attendees from around the world. I was also honoured to be asked to moderate a session. My poster and oral were in the digital health and implementation science sections at the conference which is highly relevant to my PhD topic. I attended a mentorship session with an international leader in the field of participatory research which I will utilise in my final study. I networked with international PhD students and also with Irish implementation scientists. Overall it was a very beneficial experience and provided me with invaluable lessons in presentation and dissemination.
