

# Engineering with Social Sciences and Humanities; Necessary Partnerships in Facing Contemporary (Un)Sustainability Challenges?

Edmond Byrne  
Chair Professor of Process and Chemical Engineering  
University College Cork

SHiFT COST Action Webinar, 17 April 2023

## Transformations from unsustainability Knowledge co-production via transdisciplinarity

SHiFT proposes the creation of a **transdisciplinary Hub** to address existing challenges in **advancing timely societal transformations** in the face of **climate change**.

The Hub comprises a core group of **Social Sciences & Humanities (SSH)** transdisciplinary researchers and practitioners and their extended networks ..engaging with transformation in practice ideas across different **social, political, economic, environmental, and technological contexts**.

### Working Group 01 Reflect on critical practice interventions

To explore **concepts and theoretical framings** for inclusive, reflexive and hybridized approaches to **knowledge co-production** in critical practice

SHiFT COST Action Webinar, 17 April 2023

“Our world stands at an inflection point where the choices we make today are literally going to determine the future or the history of this world for the next four to five decades — literally, not figuratively.”

*US President Joe Biden, Address to Oireachteas, Dublin, 13 April 2023*

“Look what’s happening with artificial intelligence right now. It holds enormous promise and enormous concern.”

*US President Joe Biden, Address to Oireachteas, Dublin, 13 April 2023*

“The single existential threat to the world is climate change.  
We don’t have a lot of time, and that’s a fact.”

*US President Joe Biden, Address to Oireachteas, Dublin, 13 April 2023*

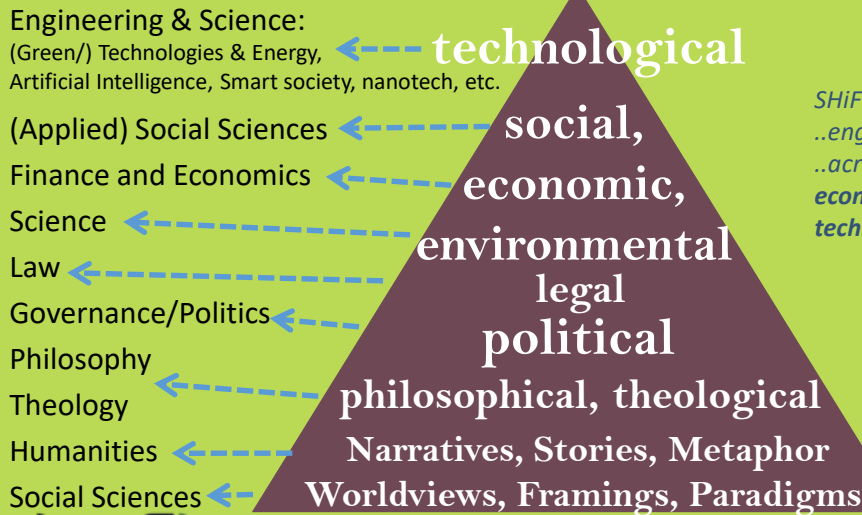

*SHiFT:*

*“transdisciplinary researchers  
..engaging with **transformation**  
..across different **social, political, economic,  
environmental, and technological contexts.**”*

# (Re/)Orienting towards '(Un/)Sustainability'?

*SHiFT: "transdisciplinary researchers ..engaging with transformation ..across different social, political, economic, environmental, and technological contexts."*

## Engineering, Social Sciences, and the Humanities

Have Their Conversations Come of Age?

E. Byrne, K. Keohane, A. Revez, E. Boyle, C. McGookin, N. Dunphy, C. O'Neill, C. Harris, I. Hughes, C. Sage, J. Barry, B. Ó Gallachóir, and G. Mullally · 1

### Chapter 21 Engineering with Social Sciences and Humanities; Necessary Partnerships in Facing Contemporary (Un)Sustainability Challenges?

Edmond Byrne, Kieran Keohane, Alexandra Revez, Evan Boyle, Connor McGookin, Niall Dunphy, Claire O'Neill, Clodagh Harris, Ian Hughes, Colin Sage, John Barry, Brian Ó Gallachóir, and Gerard Mullally

"It is a recognition of this complementary and agonistic duality (Byrne, 2017), between SSH, [and] engineering and science that has precipitated a number of academics from different disciplines at University College Cork (UCC) and beyond to reach out to initiate means of breaking down the walls between our disciplinary silos to create an authentic engagement of scholars around the issue of sustainability."

21.1 Mutual Complementarities: Engineering and the Social Sciences

“Many [recent] **technological developments** have emanated from **economic and policy drivers**, but what has often been **less developed** has been an initial regard for **broader societal contexts**, including **ethical implications**, potential **unintended consequences**, the **precautionary principle** and/or **local public acceptability**.

‘Wicked’ societal problems ...are both **normative** and **deeply contested**, and which necessarily impinge upon **ethical** and **social** domains, as well as those in **environmental, technical** and **economic** spheres.

A **holistic, integrative and complexity embracing paradigm** would embrace each and all of the aforementioned **domains**.”

Narratives, Stories, Metaphor  
Worldviews, Framings, Paradigms

Niels Bohr  
(1885-1962)

### Niels Bohr; Physics Nobel Prize (1922)

*"for his services in the investigation of the structure of atoms and of the radiation emanating from them"*

Devised 'Principle of Complementarity' in quantum physics e.g. wave/particle and position/momentum – each are inherent functions of an observer

Recipient of The Order of the Elephant (Denmark's highest-ranked honour) 1947

*Yin and yang are opposites, though interdependent; One cannot exist without the other.*

“A clear repercussion of this [‘holistic, integrative and complexity embracing paradigm’], however, is a common realization of the need for the **social sciences, the humanities (SSH), engineering, and science** to all work together, both in concert and in complement, **‘contraria sunt complementa’**, as twentieth century Nobel prize winning quantum physicist **Neils Bohr** put it.”

## Necessary Partnerships in facing Contemporary (Un)Sustainability Challenges?

“Essentially, amid the ‘silo-ised’ constraints of the university (or should that be ‘multiversity?’), the whole was not greater than the sum of the parts. More broadly, within a world of increasing ecological degradation, social upheaval and economic inequality we were making relatively feeble attempts to

Los Cuatro Postes, Ávila, Spain

**Transdisciplinarity;**  
seeking *emergent* knowledge,  
built on strong *disciplinary* pillars,  
while *transcending* them

## UNEP: Paradigmatic SHiFT needed for ‘Great Transformation’

“As a result of our continued inaction, ‘deep and rapid decarbonization processes **imply fundamental structural changes are needed**’, changes which **can only be effected** and accompanied by **‘deep-rooted shifts in values, norms, consumer culture and world views** [which] are inescapably part of the **great sustainability transformation.**’ (UNEP, 2019).

That is, the changes needed are largely **non-technological**. This reads as a powerful call to arms for **SSH**, and the **embedded knowledge, skills and values** therein, to work front and center and ***as equals with engineering and science***, in **eliciting transformative, paradigmatic change.**”

## Necessary Partnerships: for Problem Defining/Analysis and Solving/Addressing

“Left to its own devices, **sociology** can often remain within ‘**problem defining**’ or ‘**problem analysis**’ domains, thus **constraining its real, practical and transformative potential.**”

Unsustainability? Sustainability?

## Stories, Narratives, Myth, Metaphor central..

“We are moved to act in response to **stories, narratives, myths and metaphor**, as opposed to mere **cold hard facts** (as our global incapability to cut greenhouse gas emissions makes clear, following ‘this narrow approach’).

While **scientists and engineers** can **identify the source** and **amount** of greenhouse gases we emit, and **calculate** how much is needed to **reduce** them, the key question of ***why*** we continue to pump them into our environment is one that perhaps **social scientists** are better equipped to address.”

SHiFT COST Action Webinar, 17 April 2023

## The foundational value of Metaphor

“Some propose that **metaphors** actually **frame** the very **basis** of **human understanding of the world around us** (through the right hemisphere of the brain) which in turn is **translated** (in the left hemisphere) into **words and language.**”

### METAPHOR, SUSTAINABILITY, TRANSFORMATION

TRANSDISCIPLINARY PERSPECTIVES

Edited by  
Ian Hughes, Edmond Byrne, Gerard Mullally  
and Colin Sage

Sage, C., Hughes, I., Byrne, E. & Mullally, G. (2022) Metaphor, transformation, and transdisciplinarity. Routledge. (Chap 1, p.3)

## The power of metaphor, narrative..

“The chapter [6] argues that **metaphor** – together with **narrative, story, and myth**, as well as other right hemisphere constructs such as **art** and **music** – are really the only means of sufficiently moving **individuals, communities, and societies** to embark upon the type of **transformational change** that is **required** to achieve **authentic sustainability**.”

Sage, C., Hughes, I., Byrne, E. & Mullally, G. (2022) Metaphor, transformation, and transdisciplinarity. Routledge. (Chap 1, p.16)

Stories, Narratives, Myth, Metaphor are central..

# Framings, Worldviews, Paradigms..

Competing paradigmatic metaphors of:

'Integrative' Worldview

'Modern' Worldview

- Complementary **Agonistic dualism** vs. **Antagonistic** (Cartesian) **dualism**
- Deep mutual **Interconnection** vs. atomistic (Cartesian) **Separation**

## Annick De Witt's Worldviews Model

<https://wvtest.com/>

# Framing [Reality]: De Witt's Worldviews Model

## Modern

**Associated with:** Reductionist 'Science';  
'Value free' objective logic/rationality  
Techno-optimism.  
Individualistic autonomous self.  
**Certainty+Truth:** Reductionist Science

## Postmodern

**Associated with:** Deconstructivism, Scepticism  
Ineliminable Uncertainty, Relativism.  
Subjective self expression as a unique being  
**No Certainty/No [Unique] Truth:** Pluralistic  
tolerance, multiple diverse narratives.

## Traditional (Premodern)

**Associated with:** Working within and  
though natural cycles, bound up with  
irreducible mystery and enchantment.  
**Certainty+Truth:** via unique Divine order  
(mediated through sacred texts and  
customs)

## Integrative

**Associated with:** Transdisciplinarity,  
Recognition of: irreducible complexity;  
deep interconnectedness,  
ongoing process change and emergent evolution  
**No Certainty, Truth:** Integrative Science and Philosophy;  
both physical/material and numinous/spiritual. Recognize  
contingent, contextual, emergent and qualitative reality  
(*'sustainability as flourishing'*)

Paradigmatic/Worldview Frameworks (Byrne, 2017, p.56), after Hedlund-de Witt and Hedlund-de Witt (2015)

# De Witt's Worldviews Test (example\*)

## 'Modern' Worldview

### Personal

### Achievement:

Who I am is defined  
by my **social position**  
and/or my  
**achievements**

## 'Traditional' Worldview

### Community Rooted:

Who I am is defined by  
my **religion** and  
**upbringing**

## 'Postmodern' Worldview

**Individualistic/Liberation:**  
I feel more like a **citizen of  
the world** than a citizen of a  
country

## 'Integrative' Worldview

**Communally Integrated:**  
I feel part of the vast,  
**interconnected whole** that  
is **life and the universe**

(\*Q.12)

## Competing paradigmatic metaphors of:

➤ Complementary Agonistic dualism vs. Antagonistic (Cartesian) dualism

'Integrative' Worldview

'Modern' Worldview

## Complementary Agonistic dualism

Fragments of Heraclitus (Fragment 51\*):

Integrative Approaches;  
Embracing Interconnection

"The **harmonious** structure of the world depends upon **opposite tension** like that of **the bow** and **the lyre**."

Heraclitus of Ephesus (535/475 BC).

\*Heraclitus, translated by John Burnet (1912)

## Antagonistic (Cartesian) dualism

### The Project of Modernity; An Age of 'Reduction and Separation'

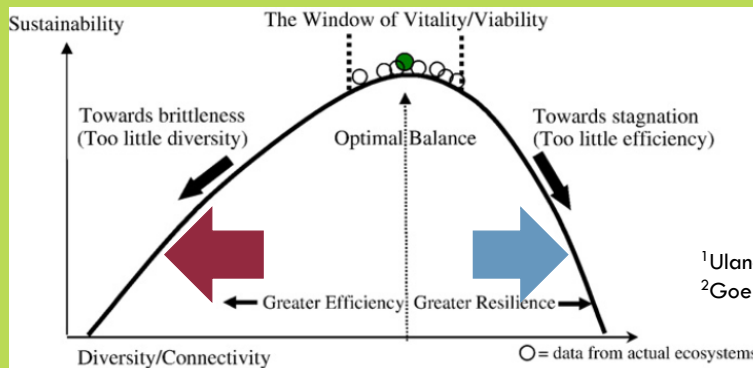

Descartes' (1596-1650) philosophy sought **certainty** through **rationality**; based on an **antagonistic dualism** and distinct **separation** between the **objective physical mechanical body** and the **subjective mind/soul**.

Amid the turmoil of early 17<sup>th</sup> Century Europe (war, turmoil, local temporal climate change) Descartes' thesis was a resounding success, and continues to be..

## Complementary Agonistic Dualism in Systems Ecology

In systems ecology, it has been quantitatively<sup>1</sup> shown that sustainable ecosystems maintain a dynamic *balance* between opposing but necessary tendencies of **efficiency** and **redundancy/resilience** (a complimentary dualism).

<sup>1</sup>Ulanowicz, 2009

<sup>2</sup>Goerner et al., 2009

Sustainability as a dialectical balance between **efficiency** and **redundancy**<sup>2</sup>

# Complementary tendencies: Efficiency vs. Resilience

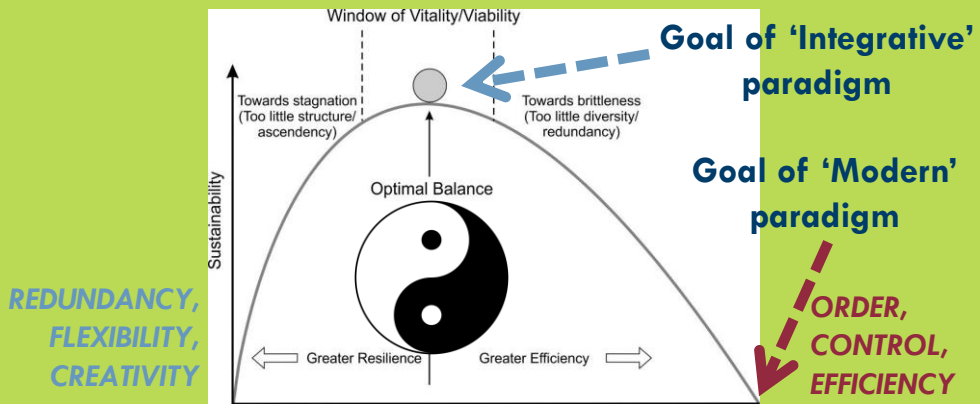

Respective ecosystems with:

(left) Higher **Redundancy/Resilience** and (right) Higher **Efficiency**

(Ulanowicz et al, 2009)

# Dialectic Balance (An 'Integrative' Framing)

Source: Byrne (2017), after R. Ulanowicz

System Sustainability characterised as a contingent dialectical **BALANCE** between complimentary (though opposing) opposites of **ORDER/CONTROL** (efficiency) and **FLEXIBILITY** (redundancy, creativity, diversity).

# Dialectic Balance (An 'Integrative' Framing)

Edgar Morin (2008): "In a universe of pure order, there would be no innovation, no creation, no evolution. There would be no life or human existence.

But neither would any existence be possible in pure disorder, because there would be no element of stability on which to found an organization. Organizations need order and they need disorder."

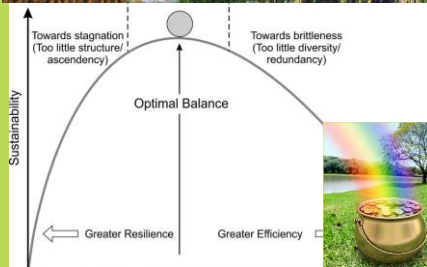

Source: Byrne (2017), after R. Ulanowicz

System Sustainability characterised as a contingent dialectical **BALANCE** between complimentary (though opposing) opposites of **ORDER/CONTROL** (efficiency) and **FLEXIBILITY** (redundancy, creativity, diversity).

## Dialectic Balance

## Framing)

"The concept of 'Sustainability' may be "posited within a (dialectical and process) Heraclitan framework, whereby contingency, change and evolution are enduring system characteristics. It fits in with broader conceptions of sustainability as an evolving and contingent quality, rather than as some ultimate point destination entailing optimisation around a unique endpoint located at the (right hand) extreme of Ulanowicz's RAINBOW, a sort of **crook of gold** exemplified by the **mirage of 100% efficiency**." (Byrne, 2017 , p.49)

## Dialectic Balance (An 'Integrative' Framing)

Window of Vitality/Viability

Optimal Balance

Towards brittleness (Too little diversity/ redundancy)

Efficiency →
