University Health and Safety Policy

University College Cork aims to create and sustain an environment for the enrichment of society and stewardship of our planet. To achieve this with respect to health and safety, as a minimum standard we will manage risk *so far as is reasonably practicable*ⁱ. We further aim to manage health and safety to *tolerable risk*ⁱⁱ levels that enable employees, students, volunteers and third parties (such as visitors, members of the public and contractors) to thrive.

This is achieved through an integrated approach, where health and safety is integral to all work carried out and not a separate entity. It's a comprehensive, management systems approach to safety, health and wellbeing that's shaped by input and participation. The approach is applied to every aspect of the University's business, including all education, knowledge exchange, research, commercial, leisure, residential and management activities.

Achieving excellence in health and safety culture "*the way things are done around here*" takes a team approach, as follows:

Senior Leadership. Governing Authority and the University Leadership Team (ULT) set, as well as lead, the culture and expectations with respect to health and safety. Overall responsibility for managing health and safety rests with the President, as chief officer, and this is delegated to and shared by ULT and managers ("Responsible Persons" - as defined below) throughout the organisation.

Managers and unit-level leadership (Responsible Persons). Heads of college, heads of functional areas, schools, departments, principal investigators and anyone who exercises supervision over another person, are responsible for implementing and maintaining systems and the appropriate allocation of resources. They provide daily pro-active supervision as part of our visible commitment to promoting a positive health and safety culture.

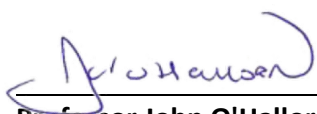

Employees, students and volunteers. Employees, students and visitors take responsibility for themselves and others. This includes identifying risks as well as working to develop and implement improvements for their areas of work/activity. Health and safe practices are understood and lived, rather than just followed. Training is attended as a core requirement, with the intent to gain an understanding of risks and the tools to manage them. All incidents and near misses are reported and investigated, not only to achieve compliance, but also to prevent future incidents.

Contractors. Contractors are selected only after demonstrating that they can reduce risk *so far as is reasonably practicable*. A positive safety culture view is adopted, where all work is undertaken as a partnership journey with UCC staff, working towards excellence.

Specific commitments

UCC will:

- Contribute to the *UN Sustainable Development Goals (SDGs)*ⁱⁱⁱ, specifically SDG 3, 6, 11 and 12, through improving human health, safety and wellbeing.
- Apply an enterprise risk management approach that considers both threats and opportunities to help it thrive in achieving its vision, strategic goals and objectives.
- Meet applicable legal requirements.
- Identify, assess, and control workplace risk in a proportionate manner, to prevent ill-health and work-related injury and promote wellbeing.
- Ensure continual improvement in our health and safety performance, leveraging people, process and technology.
- Implement health and safety policies and procedures that positively influence working conditions and control risk to persons who are not our employees but may be affected by UCC activity.
- Provide adequate resources for health and safety and the implementation of this policy.
- Integrate health and safety and associated requirements and costs as a “*cradle-to-grave*” component of UCC business, projects and research.
- Implement effective communication mechanisms on health and safety to ensure consultation of all stakeholder groups.
- Collaborate with health and safety representatives and committees, in preventing ill health and work-related injury, ensuring cooperation between the university and employees.
