## AREAS OF RESEARCH INTEREST: Historical and Archaeological

---

Though my work would involve engaging with all periods of our past, from prehistory to contemporary times, my own academic interest would be in the modern historic period, in particular the cultural links across the Atlantic - trade, shipping, piracy, smugglings, slavery and engagement during the periods of transplantation, colonization and expansion of global markets.

Some of the areas that are of particular interest to me include:

- **Piracy, Smuggling, Slavery and Prostitution in 16<sup>th</sup>- 18<sup>th</sup>-century Ireland:** the historical and cultural footprint of these maritime trades.
  - **Coastal cultural landscapes:** the utilization of the littoral coastal fringe by mariners and other coastal inhabitants.
  - **Plantations and Colonisation:** Ireland in the Atlantic world and evidence in the records (both historical and cultural) for activities such as slavery, transportations, maritime ventures, piracy and privateering.
  - **16<sup>th</sup>-18<sup>th</sup> century shipwrecks:** history and cultural evidence as singular events in time but as entities that represent wider, socio-economic and political processes that crossed oceans and linked worlds.
