

Department of Biochemistry Seminar Series 2008-2009

All seminars held on Tuesdays at 1.00pm in Room LG51, Cavanagh Pharmacy Building, unless otherwise noted.

- October 7** **Dr. Michael Carty** (NUI Galway)
Role of DNA polymerase eta and PIK kinase signalling in the response of human cells to cisplatin-induced DNA damage
(sponsored by the PhD Scholars Programme in Cancer Biology)
- October 14** **Dr. Nick Tonks** (Cold Spring Harbor Laboratory, USA)
TBA; Time: 3 – 4 pm
- October 15** **Prof. Eyal Gottlieb** (Beatson Institute for Cancer Research, Glasgow)
TBA
- October 16** **Dr. Philip Eaton** (Rayne Institute, London)
Thiol-dependent redox signalling
- December 2** **Dr. John Rouse** (MRC, University of Dundee)
TBA; Location: Food Science Bldg. BAL1
- January 13** **Dr. Amir Khan** (Trinity College Dublin)
TBA
- January 20** **Prof. Finbarr Cotter** (Queen Mary School of Medicine, London)
Genetics drives therapy for haematological malignancies
- January 27** **Dr. Patrick Walsh** (Trinity College Dublin)
TBA
- February 3** **Dr. Ruaidhri Carmody** (Dept. of Biochemistry, UCC)
PML nuclear bodies and the regulation of NF-kappaB
- February 24** **Prof. Mattias Gautel** (King's College, London)
The giant protein titin as a mechanosensor in muscle
- February 26** **Prof. Mark Lawler** (Trinity College Dublin)
Interpreting the malignant genome and its consequences: implications for the diagnosis and treatment of cancer
Location: BHSC G04
(sponsored by the PhD Scholars Programme in Cancer Biology)
- March 10** **Prof. Niamh Moran** (Royal College of Surgeons in Ireland)
Molecular choreography in the human platelet: a central role for integrins
- March 11** **Prof. Marcus Peter** (The University of Chicago, USA)
TBA
- March 31** **Dr. Stephen Rea** (NUI Galway)
TBA
