

# MASTER OF PUBLIC HEALTH

CKX11/CKX49

## WHY CHOOSE THIS COURSE?

Our comprehensive Master of Public Health programme (MPH) offers the necessary evidence-based theory and real-life application of public health issues to help you advance your career. Our students are supported by a dedicated team delivering a high quality and engaging learning experience from one of Ireland's most established, award-winning universities.

There is a global need for highly trained public health specialists in Ireland and abroad who are needed to tackle health inequality issues, communicable and non-communicable diseases and global health issues.

## WHAT YOU WILL LEARN

- Analyse & synthesise evidence-based research
- Critique theories and issues related to public health
- Identify and appraise factors that influence population health
- Construct arguments around the social, political and economic factors determining health of populations
- Demonstrate enhanced knowledge in specific public health areas such as: Health Promotion, Environmental & Global Health and Health Protection
- Employ a range of appropriate research and analysis methods with confidence and expertise

## SUBJECT AREAS

Public Health  
Health Promotion  
Health Protection  
Epidemiology & Biostatistics  
Global & Environmental Health

# TRANSFORM YOUR CAREER

Studying evidence-based research delivered by a team of public health research leaders and specialists will support the development of your public health expertise.

MPH graduates may pursue a career in public, private and non-profit organisations in areas such as:

- Research and surveillance
- Policy and planning
- Education
- Environmental protection
- Infection control

*“There are multiple modalities used like presentations, videos and discussion groups. I have already learned so much and I look at the world differently”*

**Colleen Heffernan**  
Paediatric Otolaryngologist

## CAMPUS PROGRAMME (CKX11)

The campus based programmes offers an interactive classroom experience with lectures, real-life case studies, class discussions, site visits, computer labs and student presentations. It also incorporates the following three pathway options in addition to core modules allowing students to pursue an area of special interest in public health:

- Epidemiology
- Health Promotion
- Health Protection
