

Elementary (Level A2)

This interactive course is suitable for people wishing to learn Italian for work or pleasure who have had previous exposure to the Italian language or completed the “Absolute Beginners” level.

Students joining this level should be able to say a little about themselves, to say a little about what they did (last weekend, over the summer), what they plan to do (next weekend, next year) and communicate in simple situations, although these will be revised.

The course is textbook based and is devised to consolidate existing knowledge and will build up and develop your ability to interact: speak, understand, read and write on various practical matters.

This course should consolidate Level A2 and introduce students to Level B1 of the Common European Framework.
