Hamilton, De Valera, Schrodinger and Tinney – some Irish maths stories –

With Hamilton Day approaching on October 16th, we look back on some of the contributions Ireland made to mathematics during the 1800s and 1900s. Give your brain an hour's rest and hear about William Hamilton, who carved his equations into Broome Bridge, Eamon De Valera, who moonlighted as a mathematician, Erwin Schrodinger, who spent 17 years in Dublin, and Sheila Tinney, the first Irish-born woman to earn a PhD in mathematics.
