AMRUTA NAIK - Molecular Virology Diagnostic & Research Laboratory, Department of Medicine

Training attended: 3 weeks training course on HCV pseudo particle generation at Centre for Virus Research, MRC, University of Glasgow, UK - 19th Oct- 6th Nov 2015

I am grateful to the College of Medicine & Health for providing me with the funding to attend 3 weeks training course on generating HCVpp.

Dr. Patel's lab is in the forefront of developing pseudo particle assays. Training in his laboratory provided me an excellent platform to study the neutralization of HCVpp by patient derived antibodies.

This training has given me more confidence in planning the experiments which are crucial in completing my PhD project. Also it has provided a great opportunity to establish research connection and a possible collaboration with one of the strongest groups in HCV research.

Overall, attending this course has a huge positive impact on my research skills
