

ANIRUDH VINAY JAISIMHA – Department of Pharmacology and Therapeutics

Conference Attended: XIII European Meeting on Glial Cells in Health and Disease (GLIA 2017), Location: Edinburgh, 7th-11th July 2017

I would like to thank the College of Medicine and Health for awarding this travel bursary to attend the XIII European Meeting on Glial Cells in Health and Disease (GLIA 2017) held in Edinburgh from July 7th – 11th 2017. This meeting exposed me to the role glial cells play both in maintaining brain homeostasis and disease states such as Alzheimer's disease. I was able to interact with experts in the field such as Dr. Steven Goldman and Dr. David H Rowitch who delivered key talks at this conference. I was able to disseminate the research being conducted in our lab (as a poster), which helped me gain valuable feedback from other researchers with similar interests. My attendance at this conference was helpful in expanding my knowledge base and expertise in neurodegenerative disease research and spurred me onto develop new research ideas.
