KENNETH HOWICK - School of Pharmacy/Department of Anatomy & Neuroscience

Conference Attended: 6th FIP Pharmaceutical Sciences World Congress 21st to 24th May 2017, Stockholm, Sweden.

As a recipient of the College of Medicine & Health bursary, I was grateful of the opportunity to present my research at the 6th FIP Pharmaceutical Sciences World Congress (PSWC) in Stockholm.

The FIP PSWC is the premier global event for the pharmaceutical sciences, bringing together experts from the various disciplines encompassed in the field. The conference explored systems approaches to drug discovery, development and clinical use under the theme "Future Medicines for One World". While at the conference I attended various symposia and lectures on topics ranging from novel drug delivery approaches to regulation, education and training in the pharmaceutical industry. This broadened my understanding of the pharmaceutical sciences field, while allowing me to network with peers and gain useful feedback on my own research.

I would like to express my gratitude to the College of Medicine and Health for affording me this valuable opportunity
