Conference Attended: European Drug Utilisation Research Group (EuroDURG) Conference 2017

Educational sessions introduced me to new methods useful in my future work. Plenary sessions in the conference informed me about the current research and new strategies in my research area. This has encouraged me to explore new strategies and territories within my area and will add to the novelty of my research and the relevance to policy makers, clinicians and other researchers. Presenting my work orally was a great opportunity for me to improve my communication of my research while improving my presentation skills. Questions asked during the presentation will add to the continuous improvement of my work.
