

NIKLAS KOEHL

School of Pharmacy

Conference Attended:

American Association of Pharmaceutical Scientists
(AAPS) PharmSci 360, San Antonio, USA
3rd – 6th of November 2019.

Attending AAPS provided me with the opportunity to present the latest results of my research to other leading scientists in my research area. The presentation stimulated a good discussion resulting in beneficial feedback and future research ideas. Additionally, the conference allowed me to discuss and explore the research of fellow scientists across different research topics.

I had the pleasure to attend plenary and keynote sessions by speakers like Nobel Prize co-recipient Peter Agre, Christel Bergstrom or Hanns-Christian Mahler in their respective fields. The variety of scientific topics and sessions allowed me to strengthen my knowledge in my field and to broaden my knowledge outside my own research field. I also attended workshops in the career development centre on management and communication. Additional networking events provided me with the opportunity to extend my network and to look for future career opportunities.
