

Chronic HCV & IL28B GENOTYPING

What is involved?

A simple blood test

How long will it take to get the results (in CUH)?

A few months

Why do I need this blood test?

The results will help inform your healthcare providers as to your how best to optimise your treatment options into the future.

What kind of result will I get?

Your result (GENOTYPE) will be **one** of the following:

1. CC
2. CT
3. TT

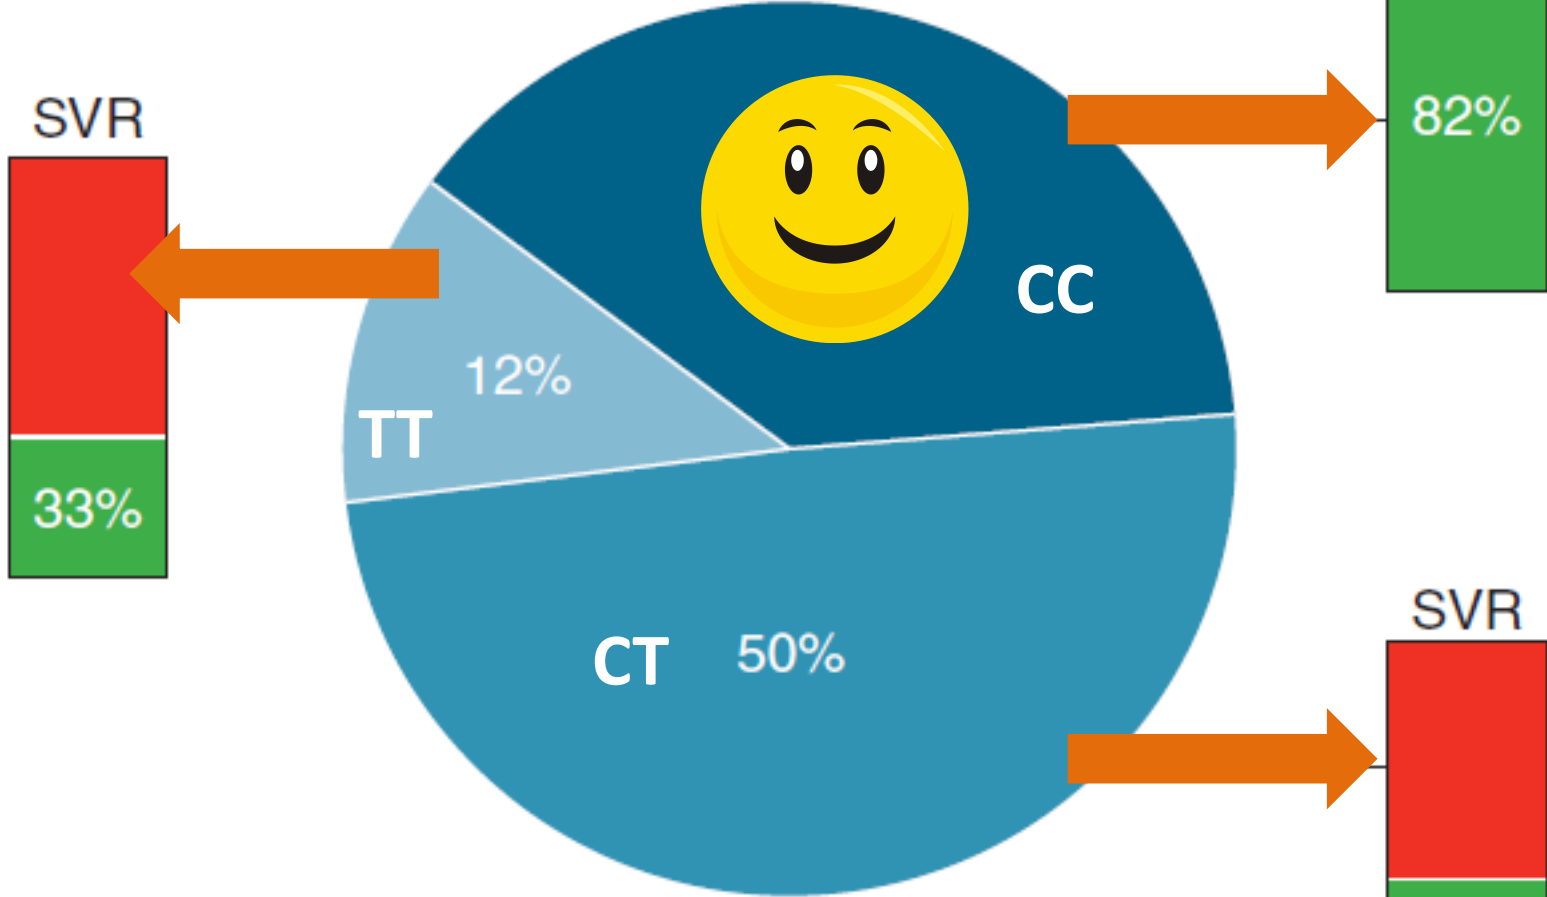

In the context of chronic hepatitis C, which GENOTYPE is associated with the best anti-viral treatment outcome?

IL28B genotype

- C/C
- C/T
- T/T

VIRAL CLEARANCE POST THERAPY IS SHOWN IN GREEN (SVR)

Therapy failure shown in red
