Transdisciplinary Perspectives on Transitions to Sustainability

Edited by **Edmond Byrne, Gerard Mullally** and **Colin Sage**

Demonstrating how a university can, in a very practical and pragmatic way, be re-envisioned through a transdisciplinary informed frame, this book shows how the most pressing and multifaceted issue of contemporary societal (un)sustainability can be addressed and understood in a way that transcends narrow disciplinary work. It also provides a practical exemplar of how far more meaningful deliberation, understandings and options for action in relation to contemporary sustainability-related crises can emerge than could otherwise be achieved. This book offers a pragmatic example which will signpost the ways others can, will and indeed must follow in our common quest for real progress.
