In addition to the above, another common solution is to use a more general website building tool as a way for students to create portfolios. The following tools are free website/blog building tools:

- EduBlogs: <http://edublogs.org/>
- Weebly: <https://www.weebly.com/ie?lang=en>
- Wordpress: <https://wordpress.com/>
- Wix: <http://www.wix.com/>

Finally, there are a couple of other options that aren't ePortfolio tools but that can be useful for collating information

- [Google Scholar](#): Allows you to create a list of publications
- [LinkedIn](#): A professional networking site on which you can create a profile and follow others in your area of interest
- [About.me](#): Allows you to create a one page website for free. You can set-up a simple profile and tell the world what you do and how to get in touch with you. It allows you to post a picture, write about yourself and your expertise, list your website and blogs, and let people know how to find you on social media sites like LinkedIn and Twitter.
