CARDEA MATRIX

CARDEA Virtual Learning Environment

The initial plan for the CARDEA Virtual Learning Environment included hosting CARDEA training materials on UCC's learning platform Canvas. From consultations with the team managing the platform within UCC it emerged that the hosting would entail costs for the project and economic barriers that would jeopardise accessibility by users. In order to promote and implement open access to CARDEA resources, training resources have been temporarily located in a section of the CARDEA website. CARDEA also explored the possibility to collaborate with Open Access platforms (i.e. EDoer) that could host the VLE. However, these platforms are not equipped with the monitoring and tracking tools that CARDEA needs in order to release micro-credentials. The future development of the Hub will include a bespoke VLE. The VLE will be designed according to the principles of Open Access and will feature the tools needed to provide records and certificates of training attendance.
