

INAD

A report on the first Irish National Audit of Demetia Care in Acute Hospitals (INAD) was published and launched in January 2014 at the National Conference <http://www.ucc.ie/en/inad/inadfullreport2014/>. The audit, kindly funded by Atlantic Philanthropies and The Meath Foundation, was carried out in all 35 acute hospitals in Ireland for their care of people with dementia. The INAD report contained forty seven recommendations for better dementia care in acute hospitals, which fed into the draft Irish National Dementia Strategy, due to be published later this year, thus directly influencing national policy. An audit in Northern Ireland is currently in the planning stages.
