

Conditions to Cultivate Transdisciplinarity

Naoko Ellis & Derek Gladwin
UBC

UBC is on the traditional, ancestral, and unceded territory of the
xwməθkwəyəm (Musqueam) People

- Environmental & Sustainability **Education**
- Systems perspectives & complexity

Derek & Naoko

How do we cultivate the conditions to hold space for multiple perspectives, uncertainty, and complexity?

- Chemical **Engineering**
- Energy transition
- Leadership

Conditioning the Soil for Change

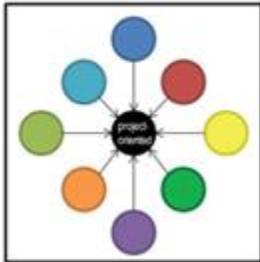

What is Transdisciplinarity?

- Transdisciplinary (TD) research often includes various disciplines dissolving into one another to create new forms of knowledge, adaptive, and collaborative team learning, and a cooperation between academia and society.
- TD employs *integrating theory* by adopting a *working methodology* when *engaging stakeholders*.

Working Methodology

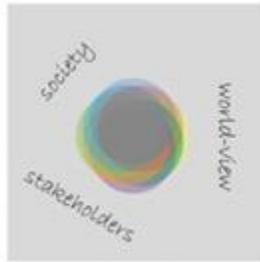

Multidisciplinary

TD tool kits & field guides

ARC Framework:

developing ways of knowing
(epistemologies)
and being (ontologies)

Affective

feelings, bodies, and
sensations
(i.e., embodied knowledge)

Relational

co-creating, collaborating,
de-centering the *self*
(i.e., interconnected knowledge)

Cognitive

thinking, memory, rationality,
experience, etc.
(i.e., intellectual knowledge)

Transdisciplinary Collaborative PhD Pilot @ UBC

Worked with 9 PhD
students and 9 faculty
members for one year

Discomfort

- How do we deal with discomfort?
- How being is the antidote to discomfort
- How do you be?

A large banner image featuring a complex, branching network of black lines on a light gray background. The lines form a dense, interconnected web that resembles a tree or a neural network. The text 'Systems Beings Lab' is overlaid on the right side of the image in a large, white, sans-serif font.

Systems Beings Lab

Who we are

Systems Beings Lab (SBL) is a collaborative research collective to facilitate and elevate various approaches to grapple with complexity. We bring process-oriented approaches to foster non-linear dynamics of un/learning, and allow space and time to explore the messes of paradoxes, contradictions, and multiples perspectives.

An aerial photograph of a coastal town and university campus. The town is built on a hillside overlooking a large body of water. The university campus is visible in the foreground, featuring several large buildings and green spaces. In the background, there are mountains under a blue sky with some clouds. The water is a deep blue, and there are many small boats or structures in the harbor area.

Come join us!

- New cohort for transdisciplinary collaborative PhD recruitment:
 - Energy transition working with communities
 - Fall 2025
 - Cohort based PhD education
