

## ROI COVID-19 Study—Update

Thank you for agreeing to participate in the ROI COVID-19 Study.

We are happy to confirm that all units have agreed to participate and submit data.

From the data submitted 262 tests have been reported and 34(13%) women tested positive and 1(6%) neonatal tested positive. In the coming weeks we will provide further information on data collection and the updated figures. This will be posted on the NPEC website.

We thank you again for your continued collaboration and look forward to providing a coherent and comprehensive overview of COVID-19 and the maternity services.
