Newton International Fellowship Scheme

Dear All,

Dr Andy McLeod asked me to draw your attention to a significant opportunity for funding of **early stage post-doctoral researchers** to spend two years at UK research institutes. The **Newton International Fellowship Scheme** provides a grant for living and research expenses with the possibility of modest follow-up funding for up to 10 years following completion of the Fellowship.

<http://www.newtonfellowships.org/the-fellowships.aspx>

The **School of GeoSciences at the University of Edinburgh, Scotland** currently hosts one visiting Newton Fellow and they would be pleased to consider **proposals for UV-effects research** from leading early stage post-doctoral researchers.

Dr McLeod expects to hear from potential applicants who are interested to develop a project proposal. Please note that the application **deadline is 4 April 2011** but electronic approval is required by the host institution before that date.

For further details, please contact:
