Grant writing

Amanda Forde, Niamh Mundow

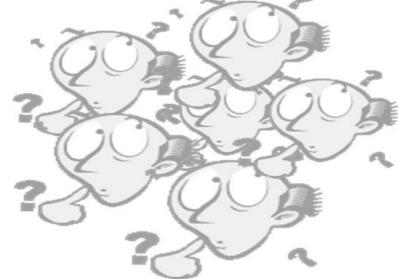

Grantsmanship....

"the art of obtaining grants for research"

Step 1

Wonder about something

Step 2

Invite others to wonder with you

Relevance

- Know your funder
 - help them help you

Read. Mission. Statement. Clearly.

One size does not fit all

- Oriented basic & applied research
- STEM
- Society & economy

Excellent research across all disciplines

Improve health & healthcare delivery

- Research & Innovation
- Cancer, climate, marine, smart cities, food security

Rules

Structure

- Title
- Abstract
- Body
- Figures, tables, gantt
- References
- Letters of support
- Budget
- Infrastructure

This is your chance to communicate - great research is no good if nobody understands it

Discussion H2

Use appropriate/attractive headings/sub-headings

In this paper, we present the results of the first systematic review or.

between objective behavioral features collected via mobile and wearable devices

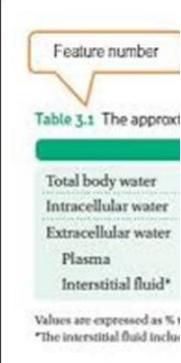

and the assessment of depressive mood symptoms as measured by different rating

scales and questionnaires.

Objective Features

Nonclinical Sample As seen in Figure 2

Review

 Write for the generalist, but be prepared for the specialist

 Reviewers can only judge what they read – help them in their job

- Make it a joy to read! Convince them
- Use the feedback
- Respond

Gender in research

Declaration of research assessment

Time

- A well-crafted grant takes time
- Write clearly, unambiguously, from the heart until you have a draft
- Work out the budget
- Get quotations
- Get letters from collaborators
- Write, re-write, re-work!
- Give enough time for internal review
- Give enough time for things to go wrong!
